

Language and Time: A Cognitive Linguistics Approach (Cambridge Studies in Cognitive Linguistics)

To appear (January, 2008) in P. Robinson & N.C.Ellis (Eds.), *Handbook of Cognitive Linguistics and Second Language Acquisition*. London: Routledge.

Chapter 19. Conclusion: Cognitive Linguistics, Second Language Acquisition and L2

Instruction—Issues for Research

Peter Robinson and Nick Ellis

Aoyama Gakuin University University of Michigan

1.0 Introduction: Language, use, and language learning

Cognitive Linguistics and usage-based models explain how we learn language using environmentally adaptive, domain-general, cognitive abilities (such as attention scheduling and working memory). We learn language while processing input and doing things with words and gesture in socially conventionalized ways (narratives, conversations) to communicate intentions and ideas to others (see Bybee, 2006; Goldberg, 2006; Gullberg, 2006; Hudson, 2007; Langacker, 1999; MacWhinney, 1999; O'Grady, 2005; Talmy, 2000; Tomasello, 2003 and their chapters in this volume). Functionalist and concept-oriented approaches to first and second language acquisition (SLA) share complementary interests in these issues (e.g., Andersen, 1984; Bardovi-Harlig, 2000; Bates, 1976; Bates & MacWhinney, 1982; Becker & Carroll, 1997; Berman, 1987; Berman & Slobin, 1994; Bloom, 1970; Cromer, 1974; Dietrich, Klein & Noyau, 1995; Givón, 1985, 1995; Greenfield & Smith, 1976; Hickman, 2003; Kamiloff Smith, 1979; Klein, 1986; Li & Shirai, 2000; Mandler, 2004a; Nelson, 1996; Perdue, 1993a, 1993b; Sato, 1990; Schumann, 1978; Schlesinger, 1982; Slobin, 1973, 1985; Snow & Ferguson, 1977; Stromqvist & Verhoeven, 2004; Tomlin, 1990; Von Steutterheim & Klein, 1987). Cognitive Linguistics describes how cognitive routines (focussing
